MODEL 416

12-36V LED COMPARTMENT LIGHTING

Rugged LED light can be used in engine compartments or step wells.

The Model 416 is designed for use in bus or recreational vehicle step wells, engine compartments, and other areas where additional lighting is needed for safety and visibility. The tough polycarbonate lens and aluminum die cast housing will withstand everyday wear and tear. Powered with LEDs, this lamp will provide years of trouble-free service. Available in black or white.

VEHICLE APPLICATIONS

- RVs
- Buses
- Construction
- Heavy Trucks

FEATURES

- Multi-Voltage
- Polycarbonate lens
- Die cast housing
- Black or White

MODEL NUMBER Model 416	DESCRIPTION 12-36V LED Compartment Light
PRODUCT SPECIFICATIONS	
Light Source	LEDs (Light Emitting Diodes)
Input Voltage	12-36V DC
Light Output	150 Lumens
Max Current Draw	0.58 Amps @ 12V; 0.28 Amps @ 24V; 0.20 Amps @ 36V
Lens	Polycarbonate
Standards	Sealed to IP67 SAE J575 – Environmental SAE J1113/2 – Electromagnetic Compatibility SAE J1113/4 – Radio Disturbance SAE J1455 – Environmental Practices
Wiring	6" flying leads standard
