

MODEL 8200

LOW PROFILE HID WORK LAMP

*Low profile, value-priced,
sealed HID work lamp*

The Model 8200 HID Work Lamp is sealed to IP67 making it ideal for inclement weather conditions where powerful lighting is mandatory. The ballast is contained inside the lamp housing for ease of installation and compact placement on the vehicle. This lamp was designed to enhance the standard lighting on utility, light construction, and material handling vehicles. Optical patterns include "low spread" or trapezoid and flood, and an amber lens version is available where safety regulations dictate.

VEHICLE APPLICATIONS

- Material Handling
- Utility vehicles
- Light construction

FEATURES

- Shock-resistant
- Stainless steel hardware
- Universal hardware easily mounts to any flat surface
