

BOBCAT FRONT AND TAIL LIGHTS

Superior visibility.

LED light is easier on eyes and the color temperature helps to keep the operator more alert. Ultimately, this improves visibility enables operators to be both more safe and productive.

Extreme durability.

Equipment (and lights) need to function in extreme conditions and in harsh worksites. Shock & vibration often cause bulb-based lights to prematurely fail, but LED lights actually excel in these conditions. The impact-resistant polycarbonate lens and housing combine with solid state electronics to provide maximum durability that you can count on.

Unmatched Longevity.

J.W. Speaker's Bobcat LED Forward and Tail Lights are designed to last in the harshest conditions.
