

# BOBCAT FRONT AND TAIL LIGHTS

## **Superior visibility.**

LED light is easier on eyes and the color temperature helps to keep the operator more alert. Ultimately, this improves visibility enables operators to be both more safe and productive.

## **Extreme durability.**

Equipment (and lights) need to function in extreme conditions and in harsh worksites. Shock & vibration often cause bulb-based lights to prematurely fail, but LED lights actually excel in these conditions. The impact-resistant polycarbonate lens and housing combine with solid state electronics to provide maximum durability that you can count on.

## **Unmatched Longevity.**

J.W. Speaker's Bobcat LED Forward and Tail Lights are designed to last in the harshest conditions.
