MODEL 234 FLASH + COLORS

BE SAFE, YOUR WAY

Bold and bright, you won't be missed! The Model 234 Flash comes in 5 different SmartHeat® color options: Amber, Blue, Green, Red, and Clear. Available accessories include a rubber mounting grommet, plastic mounting flange and 2 different trim rings to facilitate installation into different types of vehicles.

Safety from all sides. Model 234 Flash provides 3 different flash modes, an exclusive SmartSync™ system to put lamps in simultaneous or alternating flash pattern. 2-in-1 dual function strobe and turn with turn override wire.

As a durable and efficient LED, the Model 234 Flash is guaranteed to provide bright light that commands the attention of drivers behind you, alerting them to your next move. LED lights reach maximum intensity faster than incandescent counterparts, giving drivers more time to react and make necessary adjustments to avoid collisions.

Model 234 FLASH

Heated 4" Round LED Tail Lights, 12-24V DC Input

- 12-24V heated LED signal & strobe lights
- Meets SAE J595 Class II and SAE J588 Strobe standards
- SmartHeat® technology to melt snow & ice
- DOT-compliant for legal on-road use
- Sealed to IP69K for power wash & steam cleaning resistance
- Low power consumption, using only 8W of power to de-ice
- Superior condensation management
