

# MODEL 529 WARNING LIGHT

A FINE LINE BETWEEN SAFETY AND DANGER

## Safety from a distance.

J.W. Speaker's Model 529 LED Big Stripe Warning and Safety Lights will create an attention-getting safety zone whenever and wherever you need it. This light projects a long, solid barrier line to designate unsafe areas for workers and pedestrians, functioning as a new safety zone warning and indicator light.

For extra eye-catching visibility, use the flash mode instead of the constant beam of light to help alert pedestrians of unsafe areas.

Complete with mounting bracket this light is ready to take on the harshest environments. As a result, occupational safety plus operator comfort and convenience are significantly improved, preventing workplace accidents.

The rugged design of the Model 529 LED Big Stripe Warning and Safety Lights project a highly visible safety stripe of light that creates a "Keep Out" zone to keep workers, pedestrians, and other vehicles at a safe distance.

MODEL 529

START AVOIDING ACCIDENTS

The Model 529 LED Big Stripe is intended for the Agriculture, Construction, Industrial, Mining, Railroad, and Truck & Bus markets.

We know that every job site requires your full focus and attention and vehicle lighting plays an essential role in protecting operators and pedestrians from the potential dangers of moving machinery. The innovative Model 529 LED Big Stripe Warning and Safety Light is the ideal solution for identifying dangerous areas on construction and mining job sites.

As a durable and efficient LED light, the Model 529 reaches maximum intensity faster than incandescent counterparts, giving workers and pedestrians more time to react and make necessary adjustments to avoid accidents.

For added eye-catching visibility, use in flash mode. Operating at one flash per second, this light is guaranteed to provide bright light that commands the attention of those around you.

- 2 year warranty
- IP67, IP69K & ECE Reg.10 compliance standards
- 3-pin deutsche connection
- Pedestal mount for vehicles or stationary objects
- Die-cast aluminum housing with stainless steel mounting bracket and durable polycarbonate lens
- Solid optics for solid performance
- Optional flashing sequence: 1flash/second
