

MODELS 538 & 539

WARNING AND INDICATOR LIGHTS

Safety, Re-imagined.

J.W. Speaker's Models 538 & 539 LED strobe safety warning lights have been re-imagined to now include a new indicator light. With the same sleek, low-profile design as warning lights, the indicator lights add in another level of precaution on the worksite.

By lighting up red or green, the lights let the driver know if they need to buckle up or are good to go. With easy to mount applications as a Model 538 pipe mount or a Model 539 flange mount, safety has never been so simple.

Models 538 & 539 are available at your authorized J.W. Speaker dealer.

MODEL 538 & 539

TAKE SAFETY TO THE NEXT LEVEL

Durably designed, Models 538 & 539 are made with an acrylic lens that resists scratching and scuffing, so they last longer than stock warning and indicator lights. Using a solid optic design with a single LED, these industrial warning lights utilizes multiple LED colors instead of colored lenses, giving you a cleaner, tidier package with improved performance!

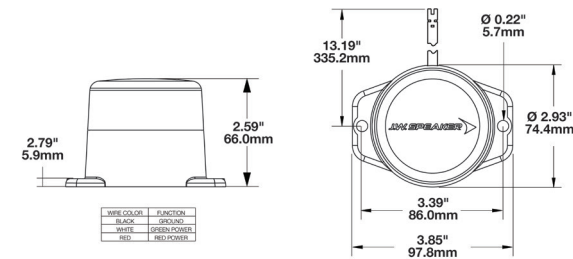

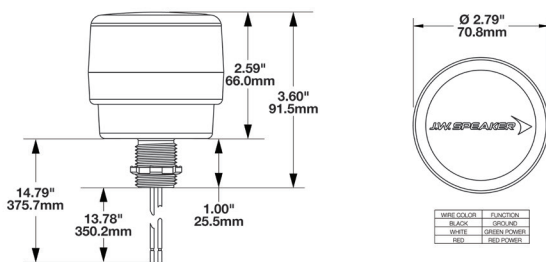

For enhanced safety, Models 538 & 539 offer a new indicator light that functions as a seatbelt indicator. This dual-color red and green light shines red when the driver's seatbelt is not buckled, and switches to green when it is.

Applications: Agriculture, Construction, Industrial, Material Handling, Mining, Railroad, Specialty Vehicles, Truck, & Bus.

Model 538 & 539 LED Warning and Indicator Lights 3" Round Pipe or Flange Mount

- Strobe warning light colors: amber, red, green, blue, & white
- Indicator light colors: red/green
- Polycarbonate housing
