

MODEL 560 LED WARNING LIGHT

PROTECT WHAT MATTERS

Start Preventing Accidents

Maintaining workers' and pedestrians' safety while keeping other vehicles at a safe distance can be a challenge on worksites and in warehouses. Time and time again, vehicle lighting has been a major solution to the perils of hazardous work environments.

With superior intensity and light quality, the innovative Model 560 LED Warning Projection Light plays an essential role in protecting operators and pedestrians from the potential dangers of moving machinery. As a result, occupational safety plus operator comfort and convenience are significantly improved, preventing workplace accidents.

MODEL 560

BUILT FOR SAFETY

Suited for Material Handling, Mining, Construction, Agriculture, Truck & Bus, and Industrial markets the Model 560 was specifically designed with worksite versatility in mind.

Many workers can be desensitized to traditional warning lights amid the dizzying array of large machines, loud noises and bright work lights on a work site. Improve safety for your crews with Model 560 lights that project brightly lit, easily recognizable and hard-to-ignore warnings.

Model 560 LED Warning Projection Light

12-72V DC system operates in 10-90V DC.

Sold as single lights.

- 12-72V DC system suitable for various applications
- ECE Compliant
- IP67, IP69K, and CE Compliant
- UL Recognized
- Pedestal mount for vehicles or stationary objects

Part No.	Description
1300631	12-72V LED Warning Projector Light
1300801	12-72V LED Pedestrian Warning Projector Light
1300661	12-72V LED Universal Red Warning Projector Light
1300791	12-72V LED Universal Blue Warning Projector Light

Model 560 LED Warning Projection Options

FORKLIFT PROJECTION:

A bright blue forklift image is enclosed within a clear, distinct red triangle to warn workers in material handling areas that forklifts are nearby. The Model 560 lights can be placed atop a forklift and display a projection several feet away to create a safe zone for workers, including other drivers.

PEDESTRIAN PROJECTION:

The "No Pedestrian" warning light alerts walkers to avoid entering a hazardous area for their safety. It flashes brightly to capture attention and clearly signals that the area ahead is unsafe for foot traffic. These lights are strategically placed at construction sites, busy intersections, and other dangerous zones to prevent accidents and ensure pedestrian safety.

UNIVERSAL WARNING LIGHT:

A large, bright red exclamation point in a red triangle signals that danger is ahead. Workers and pedestrians can see the unmistakable warning projection clearly from many feet away — and steer clear of the area.

CUSTOMIZED IMAGE:

Partner with J.W. Speaker to create and display a customized image. Using clearly identifiable objects, use the image to alert workers, drivers and pedestrians that danger looms — with a visual representation of what to be looking out for.

Choose between a steady, always-on projection or five modes of flashing projection to draw more attention. Simply activate your preferred mode by touching the projector light's black wire to the Power button for two seconds.

Mode	Inner Optic	Outer Optic
0	Steady On	Steady On
1	Flash: 60 per min (1Hz)	Flash: 60 per min (1Hz)
2	Flash: Triple flash 60 per min (1Hz)	Flash: 60 per min (1Hz)
3	Flash: 60 per min (1Hz)	Flash: Triple flash 60 per min (1Hz)
4	Flash: 200 per min (2Hz)	Flash: 200 per min (2Hz)
5	Flash: 60 per min (1Hz)	Steady On
