

MODEL 770

UPGRADE TO LED FROM HALOGEN JOHN DEERE LAMPS

Seriously Tough

The Model 770 is a durable, high-performance LED work light designed for industrial vehicles. It's built to solve common frustrations with traditional lighting such as bulbs that constantly burn out, or lights that dim under low-voltage conditions. The Model 770 delivers consistent brightness even at the minimum rated voltage, improving visibility and reducing eye fatigue in demanding environments.

Backed by a 5-year warranty, the Model 770 is a reliable, cost-effective upgrade from halogen work lights, offering longer life, less maintenance, and better overall performance without the premium price tag.

MODEL 770

BUILT FOR EVERY JOB

Built for tough environments, the 770 is a durable LED work light with flexible mounting options, designed specifically for construction equipment and agricultural machinery. From tractors and harvesters to loaders and excavators, the 770 delivers reliable illumination for long days and demanding worksites.

A Smarter Halogen Replacement

The Model 770 is purpose-built as a modern, cost effective replacement for traditional halogen work lights. Delivering a clean, white flood beam, it offers significantly better light quality and efficiency than halogen alternatives, without requiring a complete system overhaul. With a polarity neutral 12V DC input, the Model 770 simplifies installation and reduces wiring errors, making it a true plug-and-play upgrade for most industrial vehicles.

As a stripped-down version of the popular Model 770 XD, the Model 770 retains core durability and performance features while eliminating non-essential components to keep costs low. It's built with a high-impact, corrosion-resistant polycarbonate housing that weighs less than traditional die-cast lights, improving mounting flexibility and longevity in rugged environments.

Key Specifications:

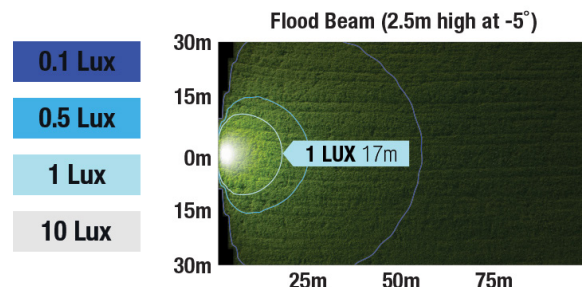

- Polarity Neutral Input Voltage
- 1,930 Raw Lumen Output
- 880 Effective Lumen Output
- Pedestal and Pendent Mount Options
- Rated IP67 & IP69K
