

Work Light, Horizontal Flood Beam  
Flange or Post Mount

Work Light, Horizontal/Vertical Scene Beam  
Flange or Post Mount

# MODEL 905

## LED WORK LIGHTS

### BRIGHTER. TOUGHER. MORE FLEXIBLE.

Bring powerful, dependable lighting to your next build with the Model 905 LED Work Light — engineered for OEMs who demand performance, durability, and design flexibility. Its slim, low-profile housing integrates cleanly into a variety of vehicle and equipment designs, reducing bulk while maintaining rugged strength for challenging work environments.

The Model 905 offers two versatile mounting options — flange or post — to suit a range of installation requirements. Available in scene or flood beam patterns, it delivers the right coverage for any task, from wide-area worksite visibility to targeted lighting for precision operations. The scene beam provides a smooth, homogeneous pattern that works exceptionally well with camera systems, ensuring clear, even illumination without hotspots. The flood beam delivers a more powerful, traditional pattern in a slim design, ideal for maximizing brightness and reach.

Built to perform in tough conditions, the Model 905 combines efficiency with long-lasting reliability, helping OEMs meet demanding application needs while minimizing downtime. Ideal for construction, industrial, agricultural, and specialty vehicle projects, it's a lighting solution designed to work as hard as the equipment it supports.

Backup & Work Light, Horizontal Flood Beam  
Post Mount

Work Light, Vertical Flood Beam  
Flange or Post Mount
