

JAE MX19/MX19A Series Connector Information

Used in J.W. Speaker models: 792, 92

The JAE MX19/MX19A series is a compact weatherproof connection system specifically designed for the automotive industry. Their small size allows J.W. Speaker to have more space for other electronic components and design features. Overall reducing the size of our lights, while increasing performance.

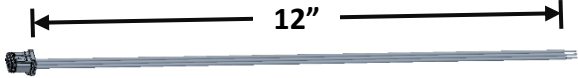

Integrated connector in JWS lamps
(above mates with JAE MX19A003S51)
