

THE WORLD'S FIRST

ADAPTIVE

LED HEADLIGHT FOR THE ROAD GLIDE®

You've been asking for it. J.W. Speaker has delivered.

The new Model 8692 Adaptive LED motorcycle headlight was designed specifically for 2013 and older Road Glides and features the same Adaptive Series™ technology that dynamically fills in the dark corners as the bike turns left or right. Embedded sensors in the headlight work in real-time to calculate banking angles to adjust and direct precise beam patterns for maximum comfort and safety for the rider.

Model 8692 Adaptive headlights are available now at your authorized J.W. Speaker dealer. For more information & technical specifications, go to www.jwspeaker.com

Road Glide is a registered trademark of Harley-Davidson, Inc.

DYNAMICALLY ADAPTIVE LED HEADLIGHT SYSTEMS

POWERFUL WHITE LIGHT WHERE YOU NEED IT

The **Model 8692 Adaptive** is the world's first dynamically adaptive motorcycle headlights™ for the Road Glide. It is designed to be a direct plug and play retrofit for the 2013 and older Road Glides models. The lighting system calculates your bike's speed and bank angle as you corner to direct a dedicated light array to light up the corner as you turn.

Also available in a non-adaptive version, both versions of the Model 8692 feature ComfortLite™ high beam optics, heavy-duty, die-cast aluminum housing and state-of-the-art LEDs to not only deliver premium performance, but also give a bike a truly unique look!

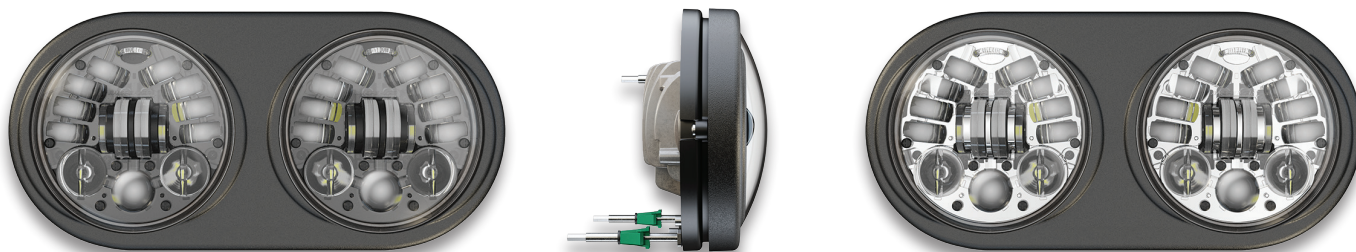

All Model 8692 headlights comply with:

Buy America Standards, ECE Reg 113 Class D, ECE Reg 50, FMVSS 108 Table XX, IEC IP67

A retrofit for 2015 and newer Road Glides coming in late 2017.

How does it work?

Experience how the Adaptive Series technology works by watching the videos found at www.jwspeaker.com/adaptive-technology

Model 8692 Adaptive

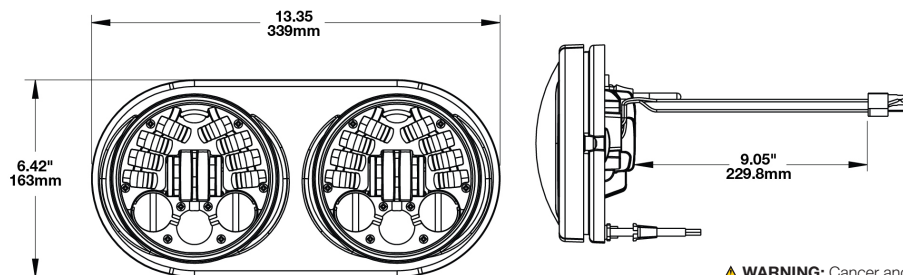

12V DC Input; Adaptive Low Beam

Part No.	Description
0553691	LED High & Low Beam Headlight with Black Bezel
