ONLY THE BEST LIGHTS FOR YOUR CUSTOM RIDE

Kick it up a notch. Replace your standard halogen headlight with industry-leading technology that gets you noticed. The sleek profile and design with precise projector optics make the Model 93M is one of the most unique-looking headlights on the planet.

Light up your night rides. Bright white LEDs throw powerful light in front of your bike with maximum output precisely where it's needed. The Dual Burn™ technology keeps the low beam light on when you fire up the long-range high beam for a safer ride. The same light that helps you see better helps everyone else see you—potentially reducing the chance of an accident because another driver “didn’t see you coming.”

Straightforward installation. A single bolt and you're done. The 93M pedestal mount bracket lets you mount it anywhere a pedestal mount headlight will go. The 4-pin Packard connector is common on many bikes, so with a single click you're wired and getting back on the road.

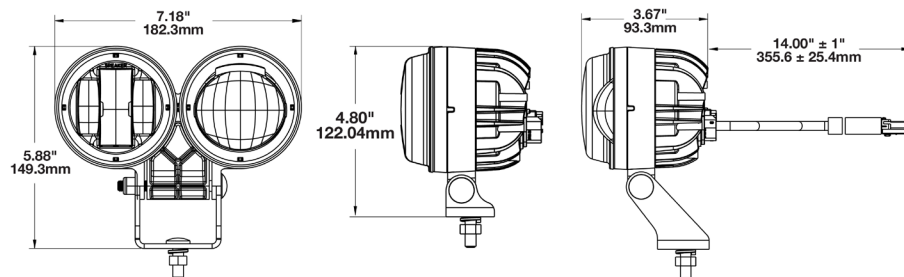

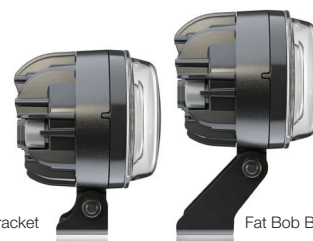

Model 93M

Dual LED High & Low Beam Headlight; 12-24V DC Input

- Fits most pedestal mount locations
- Dual Burn™ high beam optics for extra punch of light
- Built-in front position light
- Street-legal for use anywhere on the road
- 4-pin Packard connector for plug and play installation on many bikes
- Each headlight comes with two bracket options for a truly custom fit

Part No.	Description
0555911	Dual High & Low Beam LED Headlight
