

# CLASSIC STYLING MEETS MODERN TECHNOLOGY

**J.W. Speaker's LED 4-headlight system is the perfect upgrade for "Old School" trucks with H5001 and H5006 headlights.**

The model 8630 Evolution headlights are considerably more durable, longer lasting, and brighter than bulb-based sealed beams. This is because they don't have breakable bulbs, fragile filaments, or sensitive electrodes, last 50+ times longer than halogen sealed beams, and feature a bright, white light that maximizes visibility without blinding oncoming traffic.

The Model 8630 Evolution headlights are DOT- and Transport Canada-compliant for on-road use and are proudly made in the United States.

J.W. Speaker is the world leader in creating highly- engineered beam patterns. When it comes to superior visibility, extreme durability, and unmatched longevity, the Model 8630 Evolution will make your truck stand out from the crowd!

**Model 8630 Evolution**

**Double Ring Kit**
