A 90MM LED LIGHT FOR EVERY NEED

Upgrade the 90mm lights on your vehicle to the superior visibility, durability, and longevity of our 90mm family. We offer multiple headlight and signal light configurations to suit a wide variety of needs, and each meets applicable on-road standards.

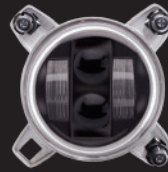

Want to reduce operational costs? Our 90mm lights feature long-lasting, energy efficient LEDs which reduce fuel consumption and eliminate the need to replace bulbs. Looking for something that won't prematurely fail? These products feature a heavy duty die-cast aluminum housing, UV-resistant polycarbonate lenses, and the latest in solid optics to withstand shock and vibration. Looking for a brighter alternative to the dull, yellow light of bulb-based headlights? Our 90mm high beam headlight produces up to 45,000 candela of bright white light! Whatever the reason, the 90mm family of products is an impressive and reliable way to upgrade the performance of your vehicle.

Model 90 High Beam

- 45,000 Max Candela
- Polycarbonate Lens
- Die-Cast Aluminum Housing
- Integrated Front Position

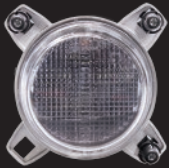

Pattern	Voltage	Lens Material	Part #
High Beam	12-24V DC	Polycarbonate	0547751

Model 90 Low Beam

- 18,500 Max Candela
- 18,000 Max Candela (Symmetrical Version)
- Polycarbonate Lens
- Die-Cast Aluminum Housing

Pattern	Voltage	Lens Material	Part #
DOT/ECE RHT Low Beam	12-24V DC	Polycarbonate	0551211
ECE LHT Low Beam	12-24V DC	Polycarbonate	0551201
Symmetrical Low Beam	12-24V DC	Polycarbonate	0551221

Model 91 DRL & Turn Signal

- Integrated Front Position
- Polycarbonate Lens
- Die-Cast Aluminum Housing

Pattern	Voltage	Lens Material	Part #
Multi-Function	12-24V DC	Polycarbonate	0345591

Model 92 DRL & Fog

- 720 Raw Lumens
- 350 Effective Lumens
- Polycarbonate Lens
- Die-Cast Aluminum Housing

Pattern	Voltage	Lens Material	Part #
Fog & DRL	12-24V DC	Polycarbonate	0549501
