

MEET THE NEW LOW PROFILE LED STROBE LIGHTS

MODELS 406 & 407

J.W. SPEAKER®
Engineered. Lighting. Solutions.

In a world filled with different regulatory standards, technologies and levels of quality, selecting the right emergency strobe light can seem like a daunting task. The all new Models 406 and 407 were designed to cut through the clutter and provide a simple, yet effective safety solution. The Model 406 is a Class II strobe light, while the Model 407 meets Class I requirements.

COMPACT & RETROFIT READY

Now 25% smaller than our current best selling strobe light, the Models 406 and 407 were designed to be a low, 4" profile in order to suit a wider range of applications and fit nearly anywhere. The universal 5" base retrofits our existing magnet mounts, making it simple and straight forward to upgrade to this new model. Amber versions are also available with DIN Mount.

DURABLE & LONG-LASTING

Constructed of impact-resistant and heavy-duty materials, our new LED strobe lights stand up to the rigors of demanding jobsites. Even better, the solid state electronics mean that they'll last up to 50 times longer than flash tube-based strobe lights!

POWERFUL OUTPUT, LOW CURRENT DRAW

Utilizing the latest in LED technology, optical engineering and circuit design, these innovative new strobe lights provide maximum visibility while consuming just a fraction of the power of traditional strobe lights. From worksite to warehouse, our new LED strobes help to promote safety and prevent accidents on the job with 6 different modes.

OEM TRUSTED, STANDARD COMPLIANT

Designed, manufactured and tested to the same high standards we use for our large OEM customers, the Models 406 and 407 meet all of the necessary regulatory standards for Class II and Class I strobe lights respectively.

Model 406 LED

- SAE J845 Class II for Utility Vehicles
- Polycarbonate Lens & Housing
- Low 4" Profile
- Meets ECE Reg. 10
- Sealed to IP67

Model	Voltage	Description	Part #
406	12-80V DC	Amber Lens	0646501
406	12-80V DC	Red Lens	0646541
406	12-80V DC	Blue Lens	0646531
406	12-80V DC	Amber with DIN Mount	0646731

Model 407 LED

- SAE J845 Class I for Emergency Vehicles
- Polycarbonate Lens & Die-Cast Aluminum Housing
- Low 4" Profile
- Meets ECE Reg. 65 & ECE Reg. 10
- Sealed to IP67

Model	Voltage	Description	Part #
407	12-80V DC	Amber Lens	0646491
407	12-80V DC	Red Lens	0646561
407	12-80V DC	Blue Lens	0646551
407	12-80V DC	Green Lens	0646571
407	12-80V DC	Amber with DIN Mount	0646741
